Measuring your organisation's Carbon Footprint

WHEN YOU NEED TO BE SURE

SGS

ISO 14064-1 Essentials – Greenhouse Gas Inventories for Organizations

Introduction

This introductory course provides basic knowledge and understanding to help organizations quantify and manage their greenhouse gas (GHG) emissions. It equips each participant with a basic introduction to GHGs, reviews the ISO 14064-1 requirements for determining GHG emission boundaries, quantifying an organization's GHG emissions and removals, and identifying specific company actions or activities aimed at improving GHG management. It also includes requirements and guidance on inventory responsibilities in verification activities.

Furthermore, the course reviews how the requirements of ISO 14064-1 relate to existing regional and national GHG schemes and other key protocols and standards, including ISO 14001 and the World Resources Institute/World Business Council on Sustainable Development of Greenhouse Gas Protocol.

Course Objectives

Attendees at this course will learn the essentials of GHG management and carbon performance. This course will provide the attendee with a good knowledge and understanding of ISO 14064-1 to facilitate quantification and management of your carbon footprint and greenhouse gas (GHG) emissions.

Course Contents

The course will cover elements of:
Course Introduction

- Welcome, introductions and course administration
- Introduction to ISO, ISO 14064 standards
- Intro to GHG Inventories
- Overall introduction to GHG inventories
- GHG inventory development process
- Quantification of GHG emissions and removals
- GHG inventory components
- Plan the development and implementation of the GHG inventory
- Develop procedures and systems required for the GHG inventory
- GHG report content
- Organization's role in verification activities

Who should attend?

This course is designed for delegates who are responsible for establishing and participating in the implementation of ISO 14064-1:2006
Individuals involved in the management organisational GHG emissions, energy and environmental consultants, GHG validators and verifiers.
